Re: Golden Dome & Ogdensburg Free Academy – Ogdensburg, NY
Request for Qualifications – Environmental Services
File No. WT997-102-03-24

Thank you for providing the opportunity for Atlantic Testing Laboratories (ATL) to submit our qualifications for the referenced project. Enclosed is a qualifications package that includes a summary of our service areas, staff qualifications, and project experience.

We are a local firm with local people and diverse capabilities.

Our office in Watertown allows us to provide trained people and other resources from just 50 miles from the project site. This close proximity allows quick adaptation to schedule demands and changes. We also have 2 other office locations within 1 hour of the project site to allocate additional resources if needed.

Our team members are cross-trained in multiple service areas, allowing project efficiencies and cost savings. ATL has been in business for over 55 years. Our staff and project experience are unmatched.

We are committed to service, quality, and responsiveness.

We pride ourselves on being responsive and flexible, with the ability to typically accommodate urgent or short notice requests on projects. Our equipment is well maintained and calibrated, and we have multiple units of critical equipment.

ATL has achieved the ACIL “Seal of Excellence/Customer Quality Service” award every year since 2010.

We are invested in technology.

We utilize technology to enhance communication and improve our service quality and responsiveness. We have various technical software and applications across all service areas to assist in data collection and analysis, reduce errors, and meet deliverable turn-around-times (TATs).

ATL utilizes a Laboratory Information Management System (LIMS) that brings our field and laboratory services to a new level. We deploy electronic devices with our field staff for real-time data capture, and have significantly improved the quality and timeliness of our deliverables.

We understand how to be a good partner.

ATL brings a broad range of in-house technical services and capabilities to the project team. We are prepared to react and respond to dynamic project schedules to avoid delays. Our people are resourceful and have experience in resolving problems and overcoming obstacles and challenges on projects.

ATL maintains certification as a Women's Business Enterprise (WBE) by the New York State Department of Economic Development, along with several other states and local WBE certifying agencies.

Our team is committed to delivering the technical support services required for your project in a responsive and collaborative manner. Thank you for your time and consideration.

Sincerely,

R. Daniel Faulkham
Senior Project Manager

OVERVIEW OF SERVICES

ATL is a full-service engineering support firm. Our combination of staff, quality, capabilities, and multiple locations make it possible for us to successfully execute any size project.

Subsurface Investigation

- Sampling of Soil and Rock
- Standard Penetration Testing (SPT)
- Cone Penetration Testing (CPT)
- Groundwater Monitor Well Construction
- Geotechnical Instrumentation Installation and Monitoring
- Environmental Soil/Groundwater Investigations

Water-Based Investigation

- Subsurface Investigation
- Sediment Sampling (Vibracore, Surface, Gravity Core)

Geotechnical

- Foundation Design Recommendations
- Pavement Design Recommendations
- Slab-on-Grade Design Recommendations
- Dynamic Pile Testing (DPT)
- Thermal and Electrical Resistivity
- Seismic Surveys and Site Classification
- Slope Stability Analysis
- Groundwater Studies
- Forensic Geotechnical Investigations

Environmental

- Asbestos, Lead, and Hazardous Materials Surveys, Design, and Project Monitoring
- Asbestos Incidental Disturbance Assessments
- Sample Collection for Laboratory Analysis
- Mold and Indoor Air Quality Investigations
- Environmental Site Assessments (Phase 1 and 2)
- Community Air Monitoring Programs (CAMP) Implementation
- Storm Water Pollution Prevention Plan (SWPPP) Inspections
- Above Ground (AST) and Underground (UST) Storage Tank Testing and Management

Special Inspection

- Soil, Concrete, Masonry, Wood, and Steel
- Driven, Cast-in-Place, and Helical Pile Deep Foundations
- Cold-Formed Metal Framing
- Wind and Seismic Resistance
- Fireproofing and Firestopping
- Exterior Insulation Finish Systems (EIFS)

Construction Materials Testing

- Soil, Concrete, Masonry, Fireproofing, Steel, and Pavement Field Testing
- Concrete and Asphalt Plant Inspection
- Concrete Mix Design and Mix Verifications
- Precast, Prestressed, and Steel Fabrication Inspection
- Welding Procedure and Performance Qualification
- Floor Flatness
- Moisture Vapor Emissions and Relative Humidity of Concrete Floors
- Pavement Surface Smoothness
- Coating Inspection and Testing
- Forensic Investigations
- Building Envelope Testing (Windows, Curtain Walls, Skylights, etc.)

Laboratory Testing

- Geotechnical Testing of Soil and Rock
- Aggregate Testing
- Construction Materials Testing
- Petrographic Analysis of Concrete and Aggregate
- Thermal Conductivity Testing of Soil and Concrete

Non-Destructive Examination and Testing

- Concrete Investigative Services: Ultrasonic Pulse Velocity, Impact Echo, Windsor Probe, Rebound Hammer, Chain Drag, Concrete Maturity, and Half Cell Corrosion
- Ground Penetrating Radar (GPR)
- Ultrasonic Testing (UT), Magnetic Particle Testing (MT), and Dye Penetrant Testing (PT)
- Vibration Monitoring
- Building Condition Surveys

COMPANY ACCREDITATIONS AND LICENSES

ATL is a member of the American Council of Independent Laboratories (ACIL). ATL has achieved the ACIL “Seal of Excellence/Customer Quality Service” award every year since 2010. ATL conforms to American Society for Testing and Materials, ASTM E329 “Specification for Agencies Involved in the Testing and/or Inspection of Materials Used in Construction”, and American Association of State Highway and Transportation Officials, AASHTO R 18 “Establishing and Implementing a Quality System for Construction Materials Testing Laboratories”, in our accredited facilities. Our testing equipment is calibrated using methods traceable to the National Institute of Standards and Technology.

ATL has AASHTO accredited and AMRL/CCRL evaluated laboratories for soil, aggregate, fireproofing, masonry, and Portland cement concrete testing. We participate in the proficiency sampling program and conduct internal quality assurance audits. ATL has U.S. Army Corps of Engineers validated laboratories for testing bituminous, soil, aggregate, masonry, and concrete. ATL encourages inspections or audits of our laboratory facilities.

Management and technical functions related to project deliverables operate under ATL’s Quality Systems Manual (QSM) of policies and procedures.

The following elements are addressed in ATL’s QSM:

- Operational procedures
- Personnel qualifications, training, certifications, and licensing
- Condition and accuracy of testing instruments and equipment
- Senior Technical Staff review of technical procedures and documents
- Sample identification, protection, chain-of-custody, storage, and disposition
- Data recording, identification, security, checking, routing, filing, and disposition
- Test results and reporting

ATL also maintains internal tracking systems to measure on-time performance in respect to reports and similar deliverables. Time deviations in reporting are analyzed and measures implemented, as necessary.

The following is a list of selected company accreditations and licenses:

- **Proficiency Sample Programs (PSP)**
- **NETTCP Laboratory Certification**
- **AASHTO Materials Reference Laboratory (AMRL) Laboratory Accreditation Program**
- **U.S. Army Corps of Engineers Laboratory Validation Program**
- **U.S. Nuclear Regulatory Commission Materials License #31-16897-02**
- **U.S. Environmental Protection Agency Lead Certification #LBP-8962-2**
- **New York State Department of Labor Asbestos Handling License #29276**
- **New York State Department of Labor Mold Assessor Company License #00359**
- **The Commonwealth of Massachusetts Concrete Testing Laboratory License #CTL21-0075**
- **ATL Engineering - The University of the State of New York Engineering License #0018640**
- **ATL Engineering - State of Connecticut Engineering License #PEC.0001203**
- **ATL Engineering - New York State Department of Labor Asbestos Handling License #15-85408**

United States Environmental Protection Agency

This is to certify that

Atlantic Testing Laboratories, Limited

has fulfilled the requirements of the Toxic Substances Control Act (TSCA) Section 402, and has received certification to conduct lead-based paint activities pursuant to 40 CFR Part 745.226

In the Jurisdiction of:

All EPA Administered Lead-based Paint Activities Program States, Tribes and Territories

This certification is valid from the date of issuance and expires April 21, 2025

LBP-8962-3

WBE CERTIFICATIONS

Atlantic Testing Laboratories maintains its status as a Women-Owned Business Enterprise (WBE) with the following states, authorities, and cities:

New York State	Port Authority of NY/NJ	City of Albany
Massachusetts	DASNY	City of Syracuse
New Jersey	County of Erie & City of Buffalo, NY	New York City

NEW YORK STATE MINORITY- AND WOMEN-OWNED BUSINESS ENTERPRISE ("MWBE") CERTIFICATION

Empire State Development's Division of Minority and Women's Business Development grants a

Women Business Enterprise (WBE)

pursuant to New York State Executive Law, Article 15-A to:

Atlantic Testing Laboratories, Limited

Certification Awarded on: July 10, 2018
Expiration Date: July 10, 2023
File ID#: 58616

**ATL has applied for recertification and remains on the New York State MWBE Directory during the recertification process.*

SECTION 2

EXPERIENCE

ENVIRONMENTAL

ATL offers a wide variety of environmental services that can assist with regulatory compliance, property renovation, business expansion, real estate transfer, and site development. ATL's team of experienced Project Managers and Engineers, Scientists, and Geologists work together to deliver reliable, accurate, and timely results and solutions to environmental project needs. Our equipment is calibrated and maintained on a regular schedule.

- **Asbestos, Lead, and Hazardous Materials Surveys, Design, and Project Monitoring**
- **Asbestos Incidental Disturbance Assessments**
- **Sample Collection for Laboratory Analysis**
- **Mold and Indoor Air Quality Investigations**
- **Environmental Site Assessments (Phase 1 and 2)**
- **Community Air Monitoring Programs (CAMP) Implementation**
- **Storm Water Pollution Prevention Plan (SWPPP) Inspections**
- **Above Ground (AST) and Underground (UST) Storage Tank Testing and Management**

ASBESTOS AND LEAD

ATL offers asbestos and lead related services in the areas of consulting, abatement project design, building surveys, management plans, operation and maintenance (O&M) plans, project monitoring and air sampling, and awareness training. ATL provides complete and accurate data to satisfy the regulatory project requirements, while striving to minimize impact to project schedule and cost.

Consulting Services

- Hazard assessments and incidental disturbance assessments
- Air, bulk, and asbestos dust sampling and analysis
- Comprehensive O&M Plans to manage in-place asbestos-containing materials
- AHERA Triennial Re-inspection Reports
- Awareness training and recognition seminars
- Third party review of designs
- Expert witness
- Lead assessments and inspection

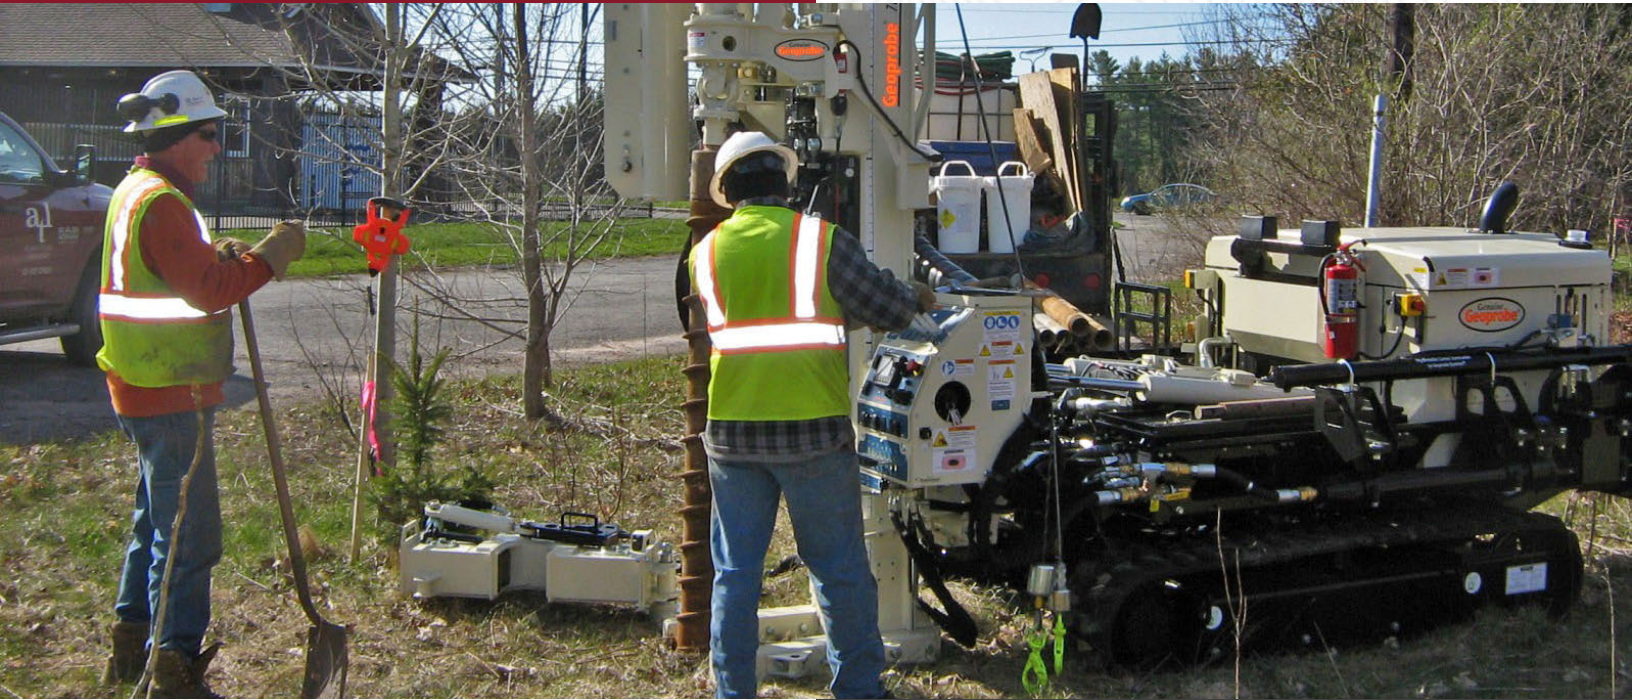

Survey and Design Services

- Surveys and abatement design often combined with assessments for other potential hazardous materials (e.g., PCB, mercury, universal waste)
- Asbestos and lead building surveys prior to renovation and/or demolition
- Site specific variances
- Construction administration

Project Monitoring Services

- Project monitoring and air sampling
- Post abatement visual clearance

JOSEPH D. GRABOWSKI

Asbestos Services Manager

Joseph is the Asbestos Services Manager at Atlantic Testing Laboratories, Limited (ATL) and is experienced in environmental, special inspection, construction materials testing, and laboratory testing.

RESPONSIBILITIES

- Oversight and performance of Asbestos Services. Responsibilities include coordination and execution of the complete project cycle, starting with the proposal preparation and qualifications submittal phase and continuing through project setup and scheduling, execution of field work and training of field technical personnel, interpretation of data and laboratory analyses, and preparation and review of reports.
- Monitoring asbestos abatement projects, hazardous materials survey, asbestos building surveys, drafting asbestos design documentation, and lead sampling.
- Field and laboratory testing of construction materials including soil, concrete, masonry, and associated report preparation.
